2021 – 2021 | Batam, Indonesia

Responsible for overseeing and managing tasks related to maintaining a Healthy & Safety Environment (HSE) Officer in the field. Ensured compliance with safety regulations, conducted regular inspections, and reported on safety protocols and environmental condition

CERTIFICATES

MICROTIC & NETWORK ENGINEER COMPETENCE CERTIFIED

KKNI Level II

EXPERTIES

Website & Mobile Apps

Developed website architecture with both server-side and client-side implementations using frameworks such as **Laravel** and **Next.js**. Implemented **REST APIs** for seamless communication between frontend and backend. Gained hands-on experience integrating the **Midtrans Payment Gateway** to enable secure payment processing on previous projects. Additionally, proficient in **Kotlin** for Android mobile app development, contributing to the creation of mobile applications with a focus on performance and user experience.

Data Analytics & Data Sciences

Proficient in **MySQL** and **Excel** for data storage and management. Experienced in using **Python** for data cleaning, exploratory data analysis (EDA), and data visualization, providing valuable insights to support business decision-making. Skilled in applying machine learning models such as **Linear Regression for predictive analytics**, and **Naive Bayes** and **K-Nearest Neighbors (KNN) for classification tasks**. Adept at leveraging data to drive business insights and inform strategic decisions.

PROJECTS

Unikom academic-system clone (link to project) [↗](#)

This project aims to develop the Unikom Academic System, a comprehensive platform designed to streamline academic processes for three key user roles: students, lecturers, and administrators. The system is built to support various academic functions, grading management, and overall academic data management.

Imagic (link to project) [↗](#)

Developed a social media platform designed for photographers and artists to showcase and express their creativity. Implemented the **Midtrans Payment Gateway** to facilitate premium subscriptions, enabling users to access exclusive features and content.
